ECE Classroom  
Key Features of An ECE Classroom  
The early years are the most important period in children’s development. Classroom must be created to make learning occur. Both the physical structure of the classroom and the environment established by the teacher lead children to interact with one another and to value a cooperative way of life. Classroom design should support children as they grow physically, developing motor skills and coordination, and as they learn and develop the social skills which can ensure success in life.  
Children will develop best if they are provided with:  
Positive, reliable and supportive relationships  
Regular routines and consistency  
Chances to repeat activities  
Opportunities to learn through hands-on interaction  
Exposure to rich, interactive language  
Novel ways to learn
