### Question Bank & Answer Key

1. The term 'Computer' is derived from.....
    - a. Latin
    - b. German
    - c. French
    - d. Arabic
  2. Who is the inventor of "Difference Engine"?
    - a. Allen Turing
    - b. Charles Babbage
    - c. Simur Cray
    - d. Augusta Adaming
  3. Who is the father of Computer?
    - a. Allen Turing
    - b. Charles Babbage
    - c. Simur Cray
    - d. Augusta Adaming
  4. Who is the father of Computer science?
    - a. Allen Turing
    - b. Charles Babbage
    - c. Simur Cray
    - d. Augusta Adaming
  5. Who is the father of personal computer?
    - a. Edward Robert
    - b. Allen Turing
    - c. Charles Babbage
    - d. None of these
  6. A CPU contains
    - a. a card reader and a printing device
    - b. an analytical engine and a control unit
    - c. a control unit and an arithmetic logic unit
    - d. an arithmetic logic unit and a card reader
  7. Which of the following controls the process of interaction between the user and the operating system?
    - a. User interface
    - b. Language translator
    - c. Platform
    - d. Screen saver
  8. The first computers were programmed using
    - a. assembly language
    - b. machine language
    - c. source code
    - d. object code
- 
-

9. ....is a combination of hardware and software that facilitates the sharing of information between computing devices.
  - a. network
  - b. peripheral
  - c. expansion board
  - d. digital device
10. Coded entries which are used to gain access to a computer system are called
  - a. Entry codes
  - b. Passwords
  - c. Security commands
  - d. Code words
11. Which of the following statements is true ?
  - a. Minicomputer works faster than Microcomputer
  - b. Microcomputer works faster than Minicomputer
  - c. Speed of both the computers is the same
  - d. The speeds of both these computers cannot be compared with the speed of advanced
12. You organize files by storing them in
  - a. archives
  - b. folders
  - c. indexes
  - d. lists
13. What type of resource is most likely to be a shared common resource in a computer Network?
  - a. Printers
  - b. Speakers
  - c. Floppy disk drives
  - d. Keyboards
14. Which device is required for the Internet connection?
  - a. Joystick
  - b. Modem
  - c. CD Drive
  - d. NIC Card
15. What is a light pen?
  - a. A Mechanical Input device
  - b. Optical input device
  - c. Electronic input device
  - d. Optical output device
16. UNIVAC is
  - a. Universal Automatic Computer
  - b. Universal Array Computer
  - c. Unique Automatic Computer
  - d. Unvalued Automatic Computer
17. CD-ROM stands for
  - a. Compactable Read Only Memory
  - b. Compact Data Read Only Memory
  - c. Compactable Disk Read Only Memory
  - d. Compact Disk Read Only Memory
18. ALU is
  - a. Arithmetic Logic Unit
  - b. Array Logic Unit
  - c. Application Logic Unit
  - d. None of above
19. VGA is
  - a. Video Graphics Array
  - b. Visual Graphics Array
  - c. Volatile Graphics Array
  - d. Video Graphics Adapter
20. IBM 1401 is
  - a. First Generation Computer
  - b. Second Generation Computer
  - c. Third Generation Computer
  - d. Fourth Generation Computer

- 
- 
21. MSI stands for
- a. Medium Scale Integrated Circuits
  - b. Medium System Integrated Circuits
  - c. Medium Scale Intelligent Circuit
  - d. Medium System Intelligent Circuit
22. The capacity of 3.5 inch floppy disk is
- a. 1.40 MB
  - b. 1.44 GB
  - c. 1.40 GB
  - d. 1.44 MB
23. WAN stands for
- a. Wap Area Network
  - b. Wide Area Network
  - c. Wide Array Net
  - d. Wireless Area Network
24. MICR stands for
- a. Magnetic Ink Character Reader
  - b. Magnetic Ink Code Reader
  - c. Magnetic Ink Cases Reader
  - d. None
25. EBCDIC stands for
- a. Extended Binary Coded Decimal Interchange Code
  - b. Extended Bit Code Decimal Interchange Code
  - c. Extended Bit Case Decimal Interchange Code
  - d. Extended Binary Case Decimal Interchange Code
26. Which of the following is a part of the Central Processing Unit?
- a. Printer
  - b. Key board
  - c. Mouse
  - d. Arithmetic & Logic unit
27. CAD stands for
- a. Computer aided design
  - b. Computer algorithm for design
  - c. Computer application in design
  - d. Computer analogue design
28. Junk e-mail is also called
- a. spam
  - b. spoof
  - c. sniffer script
  - d. spool
29. Hackers
- a. all have the same motive
  - b. break into other people's computers
  - c. may legally break into computers as long as they do not do any damage
  - d. are people who are allergic to computers
30. What type of computers are client computers (most of the time) in a client-server system?
- a. Mainframe
  - b. Mini-computer
  - c. Microcomputer
  - d. PDA
31. A computer cannot 'boot' if it does not have the
- a. Compiler
  - b. Loader
  - c. Operating System
  - d. Assembler

- 
- 
32. The amount of vertical space between lines of text in a document is called
- double-space
  - line spacing
  - single space
  - vertical spacing
33. Example of non-numeric data is
- Employee address
  - Examination score
  - Bank balance
  - All of these
34. What is embedded system?
- The programme which arrives by being wrapped in box.
  - The programme which is the permanent part of the computer
  - The computer which is the part of a big computer
  - The computer and software system that control the machine
35. First page of Website is termed as-
- Homepage
  - Index
  - JAVA script
  - Bookmark
36. .... Is the appearance of typed characters?
- Size
  - Format
  - Point
  - Colour
37. When a file is saved for the first time
- a copy is automatically printed
  - it must be given a name to identify it
  - it does not need a name
  - it only needs a name if it is not going to be printed
38. Office LANS, which are scattered geographically on large scale, can be connected by the use of corporate
- CAN
  - LAN
  - DAN
  - WAN
39. Where are data and programme stored when the processor uses them?
- Main memory
  - Secondary memory
  - Disk memory
  - Programme memory
40. .... represents raw facts, where-as..... is data made meaningful.
- Information, reporting
  - Data, information
  - Information, bits
  - Records, bytes
41. What characteristic of read-only memory (ROM) makes it useful?
- ROM information can be easily updated.
  - Data in ROM is non-volatile, that is, it remains there even without electrical power.
  - ROM provides very large amounts of inexpensive data storage.
  - ROM chips are easily swapped between different brands of computers.
42. What do you call the programs that are used to find out possible faults and their causes?
- operating system extensions
  - cookies
  - diagnostic software
  - boot diskettes

- 
- 
43. Which programming languages are classified as low level languages?
- a. BASIC, COBOL, Fortran
  - b. Prolog
  - c. C, C++
  - d. Assembly languages
44. Which of the following is not anti- viruses' software?
- a. NAV
  - b. F-Prot
  - c. Oracle
  - d. McAfee
45. Which device is required for the Internet connection?
- a. Joystick
  - b. Modem
  - c. CD Drive
  - d. NIC Card
46. What does DMA stand for?
- a. A. Distinct Memory Access
  - b. Direct Memory Access
  - c. Direct Module Access
  - d. Direct Memory Allocation
47. Which of the following is a storage device?
- a. Tape
  - b. Hard Disk
  - c. Floppy Disk
  - d. All of the above
48. When did John Napier develop logarithm?
- a. 1416
  - b. 1614
  - c. 1641
  - d. 1804
49. A normal CD- ROM usually can store up to \_\_\_\_\_ \_data?
- a. 680 KB
  - b. 680 Bytes
  - c. 680 MB
  - d. 680 GB
50. MIS is designed to provide information needed for effective decision making by?
- a. Consumers
  - b. Workers
  - c. Foremen
  - d. Managers
51. What is a light pen?
- a. Mechanical Input device
  - b. Optical input device
  - c. Electronic input device
  - d. Optical output device
52. BCD is
- a. Binary Coded Decimal
  - b. Bit Coded Decimal
  - c. Binary Coded Digit
  - d. Bit Coded Digit
53. ASCII stands for
- a. American Stable Code for International Interchange
  - b. American Standard Case for Institutional Interchange
  - c. American Standard Code for Information Interchange
  - d. American Standard Code for Interchange Information

- 
- 
54. Which of the following is first generation of computer?
- a. EDSAC                      b. IBM-1401                      c. CDC-1604                      d. ICL-2900
55. Chief component of first generation computer was
- a. Transistors                                              b. Vacuum Tubes and Valves
- c. Integrated Circuits                                              d. None of above
56. FORTRAN is
- a. File Translation                                              b. Format Translation
- c. Formula Translation                                              d. Floppy Translation
57. EEPROM stands for
- a. Electrically Erasable Programmable Read Only Memory
- b. Easily Erasable Programmable Read Only Memory
- c. Electronic Erasable Programmable Read Only Memory
- d. None of the above
58. Second Generation computers were developed during
- a. 1949 to 1955                                              b. 1956 to 1965
- c. 1965 to 1970                                              d. 1970 to 1990
59. The computer size was very large in
- a. First Generation                                              b. Second Generation
- c. Third Generation                                              d. Fourth Generation
60. Microprocessors as switching devices are for which generation computers
- a. First Generation                                              b. Second Generation
- c. Third Generation                                              d. Fourth Generation
61. Which of the following devices can be used to directly image printed text?
- a. OCR                                              b. OMR
- c. MICR                                              d. All of above
62. The output quality of a printer is measured by
- a. Dot per inch                                              b. Dot per sq. inch
- c. Dots printed per unit time                                              d. All of above
63. In analogue computer
- a. Input is first converted to digital form                      b. Input is never converted to digital form
- c. Output is displayed in digital form                      d. All of above
64. In latest generation computers, the instructions are executed
- a. Parallel only                                              b. Sequentially only
- c. Both sequentially and parallel                      d. All of above
65. Who designed the first electronics computer – ENIAC?
- a. Van-Neumann                                              b. Joseph M. Jacquard
- 
-

- 
76. The system unit of a personal computer typically contains all of the following except:
- a. Microprocessor                      b. Disk controller    c. Serial interface      d. Modem
77. A computer program that converts an entire program into machine language is called a/an
- a. Interpreter                      b. Simulator              c. Compiler              d. Commander
78. A computer program that translates one program instructions at a time into machine language is called a/an
- a. Interpreter                      b. CPU                      c. Compiler              d. Simulator
79. A small or intelligent device is so called because it contains within it a
- a. Computer                      b. Microcomputer    c. Programmable      d. Sensor
80. A fault in a computer program which prevents it from working correctly is known as
- a. Boot                      b. Bug                      c. Biff                      d. Strap
81. A self replicating program, similar to a virus which was taken from a 1970s science fiction novel by John Bruner entitled the Shockwave Rider is
- a. Bug                      b. Vice                      c. Lice                      d. Worm
82. A state. is a bi-stable electronic circuit that has
- a. Multivibrator                      b. Flip-flop                      c. Logic gates                      d. laten
83. Unwanted repetitious messages, such as unsolicited bulk e-mail is known as
- a. Spam                      b. Trash                      c. Calibri                      d. Courier
84. DOS stands for
- a. Disk Operating System                      b. Disk operating session
- c. Digital Operating System                      d. Digital Open system
85. Who is the chief of Microsoft
- a. Babbage                      b. Bill Gates                      c. Bill Clinton                      d. none of these
86. Which of the following are input devices?
- a. Keyboard                      b. Mouse                      c. Card reader                      d. Any of these
87. Examples of output devices are
- a. Screen                      b. Printer                      c. Speaker                      d. All of these
88. Which of the following is also known as brain of computer
- a. Control unit                      b. Central Processing unit
- c. Arithmetic and language unit                      d. Monitor
89. IBM stands for
- a. Internal Business Management                      b. International Business Management
- c. International Business Machines                      d. Internal Business Machines
90. .... translates and executes program at run time line by line
- a. Compiler                      b. Interpreter

- 
- 
91. is an OOP principle
- a. Structured programming
  - b. Procedural programming
  - c. Inheritance
  - d. Linking
92. COBOL is widely used in application s
- a. Commercial
  - b. Scientific
  - c. Space
  - d. Mathematical
93. RAM stands for
- a. Random origin money
  - b. Random only memory
  - c. Read only memory
  - d. Random access memory
94. 1 Byte =?
- a. 8 bits
  - b. 4 bits
  - c. 2 bits
  - d. 9 bits
95. SMPS stands for
- a. Switched mode Power Supply
  - b. Start mode power supply
  - c. Store mode power supply
  - d. Single mode power supply
96. The device used to carry digital data on analogue lines is called as
- a. Modem
  - b. Multiplexer
  - c. Modulator
  - d. Demodulator
97. VDU is also called
- a. Screen
  - b. Monitor
  - c. Both 1 & 2
  - d. printer
98. BIOS stands for
- a. Basic Input Output system
  - b. Binary Input output system
  - c. Basic Input Off system
  - d. all the above
99. Father of ‘C’ programming language
- a. Dennis Ritchie
  - b. Prof John Keenly
  - c. Thomas Kurtz
  - d. Bill Gates
100. The instructions that tell a computer how to carry out the processing tasks are referred to as computer.....
- a. programs
  - b. processors
  - c. input devices
  - d. memory modules
101. An area of a computer that temporarily holds data waiting to be processed is.....
- a. CPU
  - b. Memory
  - c. Storage
  - d. File
102. .... is the key to close a selected drop -down list; cancel a command and close a dialog box.
- a. TAB
  - b. SHIFT
  - c. ESC
  - d. F10
103. .... is the key we use to run the selected command.
- a. SHIFT
  - b. TAB
  - c. ENTER
  - d. CTRL
104. .... Is the functional key to display save-as box.

105. Data becomes ..... when it is presented in a format that people can understand and use

  - a. processed
  - b. graphs
  - c. information
  - d. presentation

106. The term ..... designates equipment that might be added to a computer system to enhance its functionality.

  - a. digital device
  - b. system add-on
  - c. disk pack
  - d. peripheral device

107. A ..... is a microprocessor -based computing device.

  - a. personal computer
  - b. mainframe
  - c. workstation
  - d. server

108. RAM can be treated as the ..... for the computer's processor

  - a. factory
  - b. operating room
  - c. waiting room
  - d. planning room

109. Which of the following are the functions of a operating system

  - a. Allocates resources
  - b. Monitors Activities
  - c. Manages disks and files
  - d. All of the above

110. To move a copy of file from one computer to another over a communication channel is called?

  - a. File transfer
  - b. File encryption
  - c. File modification
  - d. File copying

111. The primary function of the ..... is to set up the hardware and load and start an operating system

  - a. System Programs
  - b. BIOS
  - c. CP
  - d. Memory

112. What kind of memory is both static and non -volatile?

  - a. RAM
  - b. ROM
  - c. BIOS
  - d. CACHE

113. .... is computer software designed to operate the computer hardware and to provide platform for running application software

  - a. Application software
  - b. System software
  - c. Software
  - d. Operating system

114. The ..... is the amount of data that a storage device can move from the storage medium to the Computer per second

  - a. data migration rate
  - b. data digitizing rate
  - c. data transfer rate
  - d. data access rate

115. A device, which is not connected to CPU, is called as .....

  - a. land-line device
  - b. On-line device
  - c. Off-line device
  - d. Device

116. What is the other name for programmed chip?

  - a. RAM
  - b. ROM
  - c. LSIC
  - d. PROM

- 
117. On-line real time systems become popular in ..... generation
- a. First Generation
  - b. Second Generation
  - c. Third Generation
  - d. Fourth Generation
118. You use a(n) ....., such as a keyboard or mouse, to input information
- a. output device
  - b. input device
  - c. storage device
  - d. processing device
119. .... is the ability of a device to "jump" directly to the requested data
- a. Sequential access
  - b. Random access
  - c. Quick access
  - d. All of the above
120. .... provides process and memory management services that allow two or more tasks, jobs, or programs to run simultaneously
- a. Multitasking
  - b. Multithreading
  - c. Multiprocessing
  - d. Multicomputing
121. The task of performing operations like arithmetic and logical operations is called.....
- a. Processing
  - b. Storing
  - c. Editing
  - d. Sorting
122. ALU and Control Unit jointly known as
- a. RAM
  - b. ROM
  - c. CPU
  - d. PC
123. RAM is an example of
- a. Secondary memory
  - b. Primary memory
  - c. Main memory
  - d. Both (1) and (2)
124. Magnetic disk is an example of
- a. Secondary memory
  - b. Primary memory
  - c. Main memory
  - d. Both (1) and (2)
125. Which one of the following is NOT a computer language
- a. MS-Excel
  - b. BASIC
  - c. COBOL
  - d. C++
126. RAM is also called as
- a. Read / Write Memory
  - b. Long Memory
  - c. Permanent Memory
  - d. Primary Memory
127. .... Store data or information temporarily and pass it on as directed by the control unit
- a. Address
  - b. Register
  - c. Number
  - d. Memory

- 
128. Select the Odd one
- a. Operating system
  - b. Interpreter
  - c. Compiler
  - d. Assembler
129. A ..... is an additional set of commands that the computer displays after you make a selection from the main menu
- a. dialog box
  - b. submenu
  - c. menu selection
  - d. All of the above
130. COBOL is an acronym for.....
- a. Common Business Oriented Language
  - b. Computer Business Oriented Language
  - c. Common Business Operated Language
  - d. Common Business Organized Language
131. All of the following are examples of real security and privacy risks EXCEPT
- a. hackers
  - b. Spam
  - c. Viruses
  - d. identity theft
132. Which of the following is NOT one of the four major data processing functions of a computer?
- a. gathering data
  - b. processing data into information
  - c. analyzing the data or information
  - d. storing the data or information
133. All of the following are examples of storage devices EXCEPT :
- a. hard disk drives
  - b. printers
  - c. floppy disk drives
  - d. CD drives
134. The CPU and memory are located on the :
- a. expansion board
  - b. motherboard
  - c. storage device
  - d. output device
135. .... is the science that attempts to produce machines that display the same type of intelligence that humans do
- a. Nanoscience
  - b. Nanotechnology
  - c. Simulation
  - d. Artificial intelligence (AI)
136. Servers are computers that provide resources to other computers connected to a :
- a. networked
  - b. mainframe
  - c. supercomputer
  - d. client
137. When creating a computer program, the ..... designs the structure of the program
- a. End user
  - b. System Analyst
  - c. Programmer
  - d. All of the above
138. A computer program that converts an entire program into machine language at one time is called a/ an

a. Interpreter

b. simulator

c. characters

---

*Fundamentals of Computers*

- 
139. Computers process data into information by working exclusively with :
- a. multimedia                      b. word                      c. numbers                      d. characters
140. The difference between people with access to computers and the Internet and those without this access is known as the :
- a. digital divide                      b. Internet divide                      c. Web divide                      d. E-illiteracy
141. Computers manipulate data in many ways, and this manipulation is called.....
- a. upgrading                      b. processing                      c. batching                      d. utilizing
142. The ability to recover and read deleted or damaged files from a criminal's computer is an example of a law enforcement speciality called:
- a. robotics                      b. simulation                      c. computer forensics                      d. animation
143. Where does most data go first with in a computer memory hierarchy ?
- a. RAM                      b. ROM                      c. BIOS                      d. CACHE
144. The.....data mining technique derives rules from real-world case examples.
- a. Rule discover                      b. Signal processing
  - c. Neural nets                      d. Case-based reasoning
145. ....are used to identify a user who returns to a Website
- a. Cookies                      b. Plug-ins
  - c. Scripts                      d. ASPs
146. Codes consisting of lines of varying widths or lengths that are computer-readable are known as-
- a. an ASCII code                      b. a magnetic tape
  - c. an OCR scanner                      d. a bar code
147. Why is it unethical to share copyrighted files with your friends?
- a. It is not unethical, because it is legal.
  - b. It is unethical because the files are being given for free.
  - c. Sharing copyrighted files without permission breaks copyright laws.
  - d. It is not unethical because the files are being given for free.
148. Reusable optical storage will typically have the acronym-
- a. CD                      b. DVD                      c. ROM                      d. RW
149. The most common type of storage devices are-
- a. Steel                      b. optical                      c. magnetic                      d. flash
150. A device that connects to a network without the use of cables is said to be-
- a. Distributed                      b. free                      c. centralized                      d. none of these
151. A person who used his or her expertise to gain access to other people's computers to get information illegally or do damage is a-

a. Hacker

b. spammer

c. instant messenger

- 
152. To access properties of an object, the mouse technique to use is-
- a. Dragging                      b. dropping                      c. right-clicking                      d. shift-clicking
153. A DVD is an example of a (n)-
- a. hard disk                                              b. optical disc
  - c. output device                                              d. solid-state storage device
154. . The process of transferring files from a computer on the Internet to your computer is called
- a. Downloading                                              b. uploading
  - c. FTP                                              d. JPEG
155. . .... is the process of dividing the disk into tracks and sectors.
- a. Tracking                                              b. Formatting
  - c. Crashing                                              d. Allotting
156. . Help Menu is available at which button?
- a. End                                              b. Start
  - c. Turnoff                                              d. Restart
157. The technology that stores only the essential instructions on a microprocessor chip and thus enhances its speed is referred to as
- a. CISC                                              b. RISC
  - c. CD-ROM                                              d. Wi-Fi
158. Which is not a basic function of a computer?
- a. Store data                                              b. Accept input
  - c. Process data                                              d. Copy text
159. ASCII is a coding system that provides
- a. 256 different characters                                              b. 512 different characters
  - c. 1024 different characters                                              d. 128 different characters
160. Which part of the computer is directly involved in executing the instructions of the computer program?
- a. The scanner                                              b. The main storage
  - c. The secondary storage                                              d. The processor
161. When a computer is switched on, the booting process performs
- a. Integrity Test                                              b. Power-On Self-Test
  - c. Correct Functioning Test                                              d. Reliability Test
162. A computer system that is old and perhaps not satisfactory is referred to as a(n)
- a. Ancient system                                              b. Historical system
  - c. Age old system                                              d. Legacy system

- 
163. Which of the following is not a binary number?
- a. 001                      b. 101                      c. 202                      d. 110
164. Which of the following does not store data permanently?
- a. ROM                      b. RAM                      c. Floppy Disk                      d. Hard Disk
165. Which of the following is the smallest storage?
- a. Megabyte                      b. Gigabyte                      c. Terabyte                      d. None of these
166. Which of the following contains permanent data and gets updated during the processing of transactions?
- a. Operating System File                      b. Transaction file
- c. Software File                      d. Master file
167. Which of the following helps to protect floppy disks from data getting accidentally erased?
- a. Access notch                      b. Write-protect notch
- c. Entry notch                      d. Input notch
168. A modem is connected to
- a. a telephone line                      b. a keyboard
- c. a printer                      d. a monitor
169. Large transaction processing systems in automated organisations use
- a. Online processing                      b. Batch Processing
- c. Once-a-day Processing                      d. End-of-day processing
170. In a computer, most processing takes place in
- a. Memory                      b. RAM
- c. motherboard                      d. CPU
171. Which of the following is not a storage medium?
- a. Hard disk                      b. Flash drive                      c. DVD                      d. scanner
172. The computer abbreviation KB usually means
- a. Key Block                      b. Kernel Boot                      c. Kilo Byte                      d. Kit Bit
173. The typical computer criminal is a(n):
- a. Young hacker.
- b. Trusted employee with no criminal record.
- c. Trusted employee with a long, but unknown criminal record.
- d. Overseas young cracker.
174. The common name for the crime of stealing passwords is:
- a. Jacking.                      b. Identity theft.
- c. Spoofing.                      d. Hacking.

- 
- 
175. Collecting personal information and effectively posing as another individual is known as the crime of:
- a. Spooling.
  - b. Identity theft.
  - c. Spoofing.
  - d. Hacking.
176. Malicious software is known as:
- a. Badware.
  - b. Malware.
  - c. Maliciousware.
  - d. Illegalware.
177. A program that performs a useful task while simultaneously allowing destructive acts is a:
- a. Worm.
  - b. Trojan horse.
  - c. Virus.
  - d. Macro virus.
178. An intentionally disruptive program that spreads from program to program or from disk to disk is known as a:
- a. Trojan horse.
  - b. Virus.
  - c. Time bomb.
  - d. Time-related bomb sequence.
179. In 1999, the Melissa virus was a widely publicised:
- a. E-mail virus.
  - b. Macro virus.
  - c. Trojan horse.
  - d. Time bomb.
180. What type of virus uses computer hosts to reproduce itself?
- a. Time bomb
  - b. Worm
  - c. Melissa virus
  - d. Macro virus
181. The thing that eventually terminates a worm virus is a lack of:
- a. Memory or disk space.
  - b. Time.
  - c. CD drives space.
  - d. CD-RW.
182. When a logic bomb is activated by a time-related event, it is known as a:
- a. Time-related bomb sequence.
  - b. Virus.
  - c. Time bomb.
  - d. Trojan horse.
183. A logic bomb that was created to erupt on Michelangelo's birthday is an example of a:
- a. Time-related bomb sequence.
  - b. Virus.
  - c. Time bomb.
  - d. Trojan horse.
184. What is the name of an application program that gathers user information and sends it to someone through the Internet?
- a. A virus
  - b. Spybot
  - c. Logic bomb
  - d. Security patch

- 
- 
185. ----- is the measurement of things such as fingerprints and retinal scans used for security access.
- a. Biometrics
  - b. Bio measurement
  - c. Computer security
  - d. Smart weapon machinery
186. What is the most common tool used to restrict access to a computer system?
- a. User logins
  - b. Passwords
  - b. Computer keys
  - d. Access-control software
187. Hardware or software designed to guard against unauthorized access to a computer network is known as a(n):
- a. Hacker-proof program.
  - b. Firewall.
  - c. Hacker-resistant server.
  - d. Encryption safe wall.
188. The scrambling of code is known as:
- a. Encryption.
  - b. a firewall.
  - c. Scrambling.
  - d. Password proofing.
189. To prevent the loss of data during power failures, use a(n):
- a. Encryption program.
  - b. Surge protector.
  - c. Firewall.
  - d. UPS.
190. -----Is defined as any crime completed through the use of computer technology.
- a. Computer forensics
  - b. Computer crime
  - c. Hacking
  - d. Cracking
191. ----- refers to electronic trespassing or criminal hacking.
- a. Cracking
  - b. Jacking
  - c. Spoofing
  - d. Smarming
192. The first electronic computer was developed by
- a. J.V. Attansoff
  - b. Bill Gates
  - c. Simur Cray
  - d. Winton Serf
193. Snowbol is an/a-----
- a. Operating system
  - b. HLL
  - c. Software
  - d. Search engine
194. Switching device of fifth generation computer is-----
- a. Vacuum tubes
  - b. Transistors
  - c. IC
  - d. VLSI
195. ----- computers operates essentially by counting
- a. Portable computer
  - b. Hybrid computer
  - c. Analog computer
  - d. Digital computer

- 
- 
196. ----- computer is small general purpose micro computer, but larger than portable computer
- a. Hybrid                                      b. Digital                                      c. Desktop                                      d. Laptop
197. Cathode Ray Tube is a form of.....
- a. Keyboard                                      b. Mouse                                      c. Monitor                                      d. Mother board
198. Trackball is a.....
- a. Input device                                      b. Output device
- c. Programming language                                      d. Software
199. .... computer is a medium sized computer
- a. Micro                                      b. Mainframe                                      c. Super                                      d. Mini
200. .... computer are of large size
- a. Micro                                      b. Mainframe                                      c. Super                                      d. Mini
201. Note book, laptop,palm,hand-held computers are coming under the category of..... computer
- a. Digital computer                                      b. Mainframe computer
- c. Portable computer                                      d. Hybrid computer
202. Light pen and joystick are.....
- a. Algorithm                                      b. Input devices
- c. Output devices                                      d. Portals
203. Touch Screen is.....
- a. Input device                                      b. Output device
- c. Both a & b above                                      d. None of these
204. ....printer is the cheapest in terms of price and operating cost
- a. Inkjet                                      b. Laser
- c. Thermal                                      d. Dot matrix
205. .... printer is a non-impact printer and is quite in working
- a. Inkjet                                      b. Laser
- c. Thermal                                      d. Dot matrix
206. .... are high-end printers
- a. Inkjet                                      b. Laser
- c. Thermal                                      d. Dot matrix
207. .... are used for plotting graphs and design on papers
- a. Trackball                                      b. Joystick
- c. Light pen                                      d. Plotters
208. Daisy wheel, Drum, chain etc are the .....
- a. Flow chart                                      b. Mouse

- c. Key board
  - d. Printers

209. ....are specific to users' needs

  - a. System software
  - b. Application software
  - c. Assemblers
  - d. Compilers

210. Joshy, Perfumes are examples of.....

  - a. Operating system
  - b. Computer languages
  - c. Computer viruses
  - d. Web portals

211. Which of the following is/ are operating systems

  - a. Windows
  - b. Unix
  - c. OS/2
  - d. All of these

212. "MAN" stands for

  - a. Maximum Area Network
  - b. Minimum Area Network
  - c. Main Area Network
  - d. Metropolitan Area Network

213. Which of the following is a network topology

  - a. LAN
  - b. WAN
  - c. MAN
  - d. BUS

214. Which of the following is a type of network

  - a. Ring
  - b. Bus
  - c. Star
  - d. PAN

215. VOIP stands for.....

  - a. Voice over IP
  - b. Video over IP
  - c. Viruses over IP
  - d. Virtual over IP

216. The first web browser is

  - a. Mosaic
  - b. Netscape
  - c. Internet explorer
  - d. Collabra

217. LAN stands for.....

  - a. Limited Area Network
  - b. Logical Area Network
  - c. Local Area Network
  - d. Large Area Network

218. .... are set of rules and procedures to control the data transmission over the internet

  - a. IP address
  - b. Domains
  - c. Protocol
  - d. Gateway

219. NOS stands for

  - a. Node operating system
  - b. Non-open software
  - c. Network Operating system
  - d. Non-operating software

220. .... are system software to facilitate editing of text and data

  - a. MS Word
  - b. Editors

- 
221. Computers, combine both measuring and counting, are called :
- a. Analog                      b. Digital                      c. Hybrid                      d. All of these
222. In world today, most of the computers are :
- a. Digital                      b. Hybrid                      c. Analog                      d. Complex
223. Physical structure of computer is called :
- a. Software                      b. Hardware                      c. Human ware                      d. All of these
224. In which type of computer, data are represented as discrete signals.
- a. Analog computer                      b. Digital computer  
c. both                      d. Hybrid Computer
225. Which of the following is available in the form of a PC now?
- a. Mainframe                      b. Microcomputer  
c. Minicomputer                      d. Both (B) & (C)
226. PARAM is an example of:
- a. Super computer                      b. PC  
c. Laptop                      d. PDA
