Assessment

There are a number of assessment terms that will appear in any discussion of assessment. Listed below

are common interpretations of some of these terms:

- A working definition of Assessment for learning from a widely cited article contends: "the term 'assessment' refers to all those activities undertaken by teachers, and by their students
- provide information to be used as feedback to modify the teaching and learning activities in Since this seminal article, educators have differentiated assessment according to its purpose:

ASSESSMENT FOR LEARNING

- comprises two phases-initial or diagnostic assessment and formative assessment
- assessment can be based on a variety of information sources (e.g., portfolios, works in progress, teacher observation, conversation)
- verbal or written feedback to the student is primarily descriptive and emphasizes strengths, identifies challenges, and points to next steps
- as teachers check on understanding they adjust their instruction to keep students on track
- no grades or scores are given record-keeping is primarily anecdotal and descriptive
- occurs throughout the learning process, from the outset of the course of study to the time of summative assessment

ASSESSMENT AS LEARNING

- begins as students become aware of the goals of instruction and the criteria for performance
- involves goal-setting, monitoring progress, and reflecting on results
- implies student ownership and responsibility for moving his or her thinking forward (metacognition) pakjobsinfo.com
- occurs throughout the learning process

ASSESSMENT OF LEARNING

- assessment that is accompanied by a number or letter grade (summative)
- compares one student's achievement with standards
- results can be communicated to the student and parents
- occurs at the end of the learning unit

EVALUATION

Diagnostic assessment (now referred to more often as "pre-assessment")

- assessment made to determine what a student does and does not know about a topic
- assessment made to determine a student's learning style or preferences
- used to determine how well a student can perform a certain set of skills related to a particular subject or group of subjects
- occurs at the beginning of a unit of study
- used to inform instruction: makes up the initial phase of assessment for learning

FORMATIVE ASSESSMENT

- assessment made to determine a student's knowledge and skills, including learning gaps as they progress through a unit of study
- used to inform instruction and guide learning
- occurs during the course of a unit of study
- pakjobsinfo.com
- makes up the subsequent phase of assessment for learning

MIMMATIVE ASSESSMENT assessment that is made at the end of a unit of study to determine the level of understanding the includes a mark or grade against an expected standard Their principal focus is on crucial aspects of assessment for learning, including how such issessment should be seen as central to classroom practice, and that all teachers should regard esessment for learning as a key professional skill. According to celebrated educators, there are five key components of assessment: The provision of effective feedback to students. The active involvement of students in their own learning. Adjusting teaching to take account of the results of assessment. Recognition of the profound influence assessment has on the motivation and self-esteem of pupils, both of which are critical influences on learning. The need for students to be able to assess themselves and understand how to improve. 亦亦亦亦亦亦亦亦亦亦亦亦亦亦亦亦亦亦亦亦 **OBJECTIVE - MCQs** Present-day philosophy of education lays emphasis upon the adjustment of the whole individual physically, mentally, emotionally, and; (A) Socially (B) Politically (C) Chemically (D) Correctly It is important that educational outcomes reflect broad (A) Philosophical (B) Practical (D) Mutual pakjobsinfo.com (C) Educational It no longer is possible or desirable to limit school instruction merely to the direction of subject-matter mastery or skill proficiency.
